

## COVID-19 VISITOR RESTRICTIONS

Given the vulnerability of our residents, and facility locations in counties with community spread virus, Promenade has suspended all visitation except when medically necessary on all visitors from coming to our facilities to help prevent the risk of COVID-19. Such protocol has also been mandated by guidance issued by the New York State Department of Health.

We would appreciate your cooperation as implement these protocols to maintain the health and safety of our residents and employees during the evolving coronavirus epidemic. Of course, our visiting restrictions and protocols are subject to change as additional information becomes available.

You may call the Promenade community to obtain further information.
